Let's Start!

Let's talk about eating habits.

Learning Outcome

Identify and describe personal and regional eating habits and cooking in a range of communicative situations.

Ask your partner:

- Have you gone on some kind of diet for health reasons?
- What did you have to do?

Can Do Statements

- I can talk about daily routines and eating habits in the present.
- I can express what is necessary.
- I can talk about quantities and amounts.

Let's Explore!

Sally thinks about going on a diet. What does Vanessa say?

Instructions: Read the text aloud.

- Sally:** Vanessa, I've decided - I'm going to go on a diet.
- Vanessa:** Oh, seriously? Why now?
- Sally:** Well, I drink 5-6 cups of coffee everyday, and I eat too much fast food.
- Vanessa:** Yeah, you're going to have to stop eating so much if you want to feel healthy.
- Sally:** For sure. I'm going to have to eat more nutritious foods to not gain any more weight. I even used to be vegetarian. Now I like meat.
- Vanessa:** And you don't have to eat just a little bit or eat only salads. You've just gotta make better choices in what you consume.
- Sally:** Hmmm, tell me more.
- Vanessa:** You see, you've got to eat foods with protein and fiber to keep you full longer. Reduce your calories to 1500, and have a good portion of fruits and veggies with every meal. Some have good antioxidants too.
- Sally:** So, I can still ingest exciting foods.
- Vanessa:** Yeah, and desserts aren't against the law. Just watch your portions.
- Sally:** Alright. I'll commence on the journey tomorrow.

Let's Practice!

Why does Sally want to go on a diet*?

*Not all "diets" aim at losing weight. Some people aim to not eat meat or wheat in their "diet".

Instructions: Read the dialogue on page 2 again. Circle all the possible answers.

1. What is Sally's reason for going on a diet?
 - a. She feels healthy.
 - b. She drinks 5-6 cups of coffee every day.
 - c. She is a vegetarian.
 - d. She eats too much fast food.
 - e. She doesn't want to gain more weight.
2. What doesn't Sally have to do?
 - a. She doesn't have to eat only salads.
 - b. She doesn't have to stop eating so much.
 - c. She doesn't have to make better choices.
 - d. She doesn't have to watch her portions.

Let's Practice!

Less is better - what does Sally think?

Instructions: Proofread the sentence. Find and circle the incorrect word. Write down the correct word to complete the sentence.

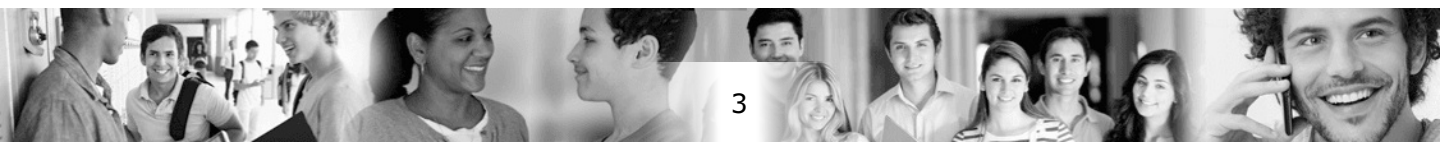

1. I drink 6 cups of coffee every day.

2. I eat too many fast foods.

3. You don't have to eat just a lot of bit.

4. Reduce your calories to 50,00 per day.

5. Have a good porter of fruits and veggies.

Extension Activity

Work on a plan to change your diet. Express necessity on how it can improve.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Think about everything you eat each day and how your diet can improve. Write down some notes.
- Write 5 sentences using expressions of necessity on how you plan to make your diet more nutritious.
- Be sure to also include quantities and amounts in your sentences.
- Read your new diet plan to your partner.

Self-Assessment

Yes

No

I apply critical-thinking to my eating habits.

☐ ☐

I write complete statements on how my diet can improve.

☐ ☐

I express necessity and quantities.

☐ ☐

I read my new diet plan to my partner.

☐ ☐

Target Words

- healthy** (adjective): to eat food or live in a way that's good for your health
e.g. You have to stop eating so much if you want to be healthy.
- to gain weight** (verb): a more polite way to talk about increase in weight
e.g. Sally would have to eat more nutritious foods to not gain weight.
- protein** (noun): a substance found in milk, eggs, meat and beans that helps the body to grow and be strong
e.g. Foods with more protein are important to make your muscles strong.
- fiber** (noun): vegetable material that cannot be digested and helps other food to pass through your body
e.g. Foods with more fiber helps to clear your system.
- calorie** (noun): a measurement used to indicate the amount of energy that food will produce in the human body
e.g. Each of us should eat enough food to get 1500-2000 calories a day.
- antioxidant** (noun): a substance contained in certain foods that prevents some chemicals from damaging our body
e.g. Blueberries and broccoli contain a lot of antioxidants.
- to ingest** (verb): to eat or swallow
e.g. Ingesting a lot of deep-fried foods is not healthy.

Learning Points

Expressing Quantities and Amounts

The most usual words used to express quantity in English are **much** and **many**.

You use **much** with *non-count nouns* to refer to an amount:

Examples:

There is so much to say about the new film!

How much time do you have this week?

There isn't much food in the house.

You use **many** with *count nouns* to refer to a number:

Examples:

Many people prefer winter vacations.

How many books on archaeology do you have?

There aren't many apples in the fridge.

The following expressions are also used with *count nouns* and *non-count nouns*

a lot of
lots of
plenty of
a great deal of
a large number of
the majority of

Examples:

- *I eat too much fast food.*
- *I had too many slices of pizza last night.*
- *I must drink a lot of water.*

Learning Points

Saying what is NOT necessary

You use "**Don't have to**" or "**Doesn't have to**" to express what is not necessary. Remember to use a verb in its base form after "**Don't/Doesn't have to**".

Structure:

Subject You/We/I/They She/He	+ auxiliary in negative don't doesn't	+ <i>have</i> to	+ verb in base form (infinitive)	+ complement
------------------------------------	---	------------------------	-------------------------------------	--------------

Examples:

- You **don't** have to eat just a little bit or eat only salads.
- She **doesn't** have to watch her portions.
